Scalable Employee Management

Full Stack Project

Needed in the System (EMPLOYEE)

(i) Employee will log in. (When login, time counting will start.)

(ii) Employee will see their tasks and for the day

(iii) If task is not completed in the given time, it will count extra time as overdue.

(iv) In each task, there will be an option to tick as done, 25% done, 50% done, 75% done option. And these options will only be visible when the task is overdue. And there will be a comment box to explain why it's taking time, why it's not completed.

(vi) There will be a dashboard with graphs and all, showing:

a) Performance chart (automatically calculated by how, when the task is completing)
b) Total hours worked.
c) Total tasks given, completed, and pending. (Also, there will be specific tab for the tasks .)

(vi) Employee can apply for leave. On submitting the leave application, an email will be sent to the super admin.

(vii) Employee can change their profile image.

(viii) When an employee logs out, the daily EOD (End of Day) report will be created automatically, including their working hours.

(ix) Monthly task performance will be created automatically, along with the daily EOD report. Employees can view these reports.

(x) If a task was not allotted by the admin but the employee is doing the task, the employee can add that task to their task list/task manager.

(xi) Suppose a task is timed for more than one day. Then, in the EOD report, the employee can mark the progress bar of that task.

Admin

(i) Admin will create an employee account. In the account, there will be:

- Name (first name and last name)
- Designation
- Department

(ii) Admin can delete an employee account.

(iii) Admin will assign tasks, time and dedicate the task to an employee.

(iv) One task can be dedicated to multiple employees.

(v) Admin can change the allotted time later or adjust the time (if needed). It will also be noted with a reason.

(vi) Only the Super Admin can approve or reject leave applications.

(vii) Admin dashboard will open with the present-day chart showing:

- How many employees are present.
- What tasks are going on.
- Task progress bars.

(viii) Admin/Super Admin can view each employee's tasks by clicking on the employee and seeing every employee's full details.

(a) Current work progress.

(b) Total days worked and total hours worked, with time and task completion details.

(c) Leave details.

(d) Performance chart.

(e) If the admin wants to comment on something, they can do so for the Super Admin.

(f) monthly performance chart , daily/monthly EOD will also be visible to the Admin

Employee Lunch Break and Working Hours

- When an employee is on a lunch break, there will be an option to mark the lunch break.
- While the lunch break is active, the working timer will not count.
- When the lunch break ends and the employee untick the mark, the working timer will resume counting.
- The timer will start when the employee logs in and will stop when the employee logs out.
